**“LIFE BEGINS AT 80:** *I have good news for you. The first 80 years are the hardest. The second 80, my experience shows, is a succession of birthday parties. Everyone wants to carry your baggage and help you up the steps. If you forget your name, or anyone else’s, or promise to be at two or three places at the same time, or if you spell words wrongly, you need only explain that you are 80.*

*At 80 you can relax with no misgivings. You have a perfect alibi for everything. Nobody expects much of you. If you act silly, it’s your second childhood. Everyone is looking for symptoms of addling of the brain. It is a great deal better than being 65 or 70. At that age they expect you to retire and become a discontented, grumbling has-been.*

*But if you survive until you are 80, everybody is surprised that you are alive, surprised that you can walk, surprised that you can reveal lucid intervals. At 70 people are mad at you for everything, but at 80 they forgive you for anything. If you ask me, life begins at 80! – Unknown (thanks Thea)*
