Mission Statement:

To love God and to love our neighbours and become an increasingly relevant presence in our community.

SUNDAY JULY 28, 2019

Prayer of the Day – “Provident Father, with the prayer Your Son taught us always on our lips, we ask, we seek, we knock at Your door: help us so to seek that we may truly find, so to ask that we may joyfully receive, and so to knock that the door of mercy may be opened for us; through Jesus Christ our Lord. Amen.

ABM Pew Sheet Reflection 2019: *“Hosea’s life must have been like a nightmare, being called by the Lord to marry a prostitute (symbolic of God’s loving relationship with unfaithful Israel) and to give their children symbolic names relating to God’s warnings of judgment on Israel – extreme action inspired by our loving God to try to draw the people back into relationship with God.*

Centuries later and still today, Paul encourages us to remain faithful to our Lord Jesus Christ who through the extreme loving action of the cross has delivered those who believe in him from all other influences that threaten to control our lives and draw us away from God. In order to do so, prayer is essential – prayer to God as a Father who seeks our cooperation to further his kingdom of love and who provides for our physical needs and will meet our spiritual needs.”

“Paper is a renewable resource but takes more energy to make - it’s made from raw wood from trees, a renewable resource when grown sustainably. It’s argued to be a preferable alternative to plastic, being biodegradable, compostable & recyclable.

Plastic is made from fossil fuels such as coal, natural gas & crude oil, all considered to be non-renewable resources. Plastic can take thousands of years to decompose while paper degrades naturally within a decade.

Products that are ‘natural’ may seem like a better choice but paper bags actually have a greater environmental impact than high-density polyethylene plastic bags because of the production process & the amount of material needed per bag.

Paper requires 4 times more energy & 3 times the amount of water to produce compared to plastic, also heavier & bulkier, so more fuel & trucks are needed for transport. The other downside of paper is its bulk – while it doesn’t take more than a few years to break down, it does take space, another reason why it should be recycled instead of being sent to landfill.” – cleanaway.com.au
